I still need to review the documents this afternoon, but that is a good phrase to lean on.

FYI-

Please see the information provided by the Ex. 5 Personal Privacy (PP) response to some of the dialogue we had during last week's interview. In addition, the transcript from the interview is attached.

Hi Brittany,

I'm attaching the following:

(1) a review by [REDACTED] of health findings in the Kaua'i Joint Fact Finding report;

(2) graphs illustrating some of those findings, about which [REDACTED] asked me to inform you:

"The school graphs show the three school districts on Kauai. The district entitled Waimea, for the purpose of these graphs, contains only the two elementary schools which are in the geographic areas with the most pesticide spraying. The high school and middle school graphs are by school as each school district has just has one high school and one middle school. Waimea High and Waimea Canyon School are the two schools in the pesticide spraying areas.

The percentage refers to the percentage of each school population with the problem being graphed. There is some transferring of students into other districts due to capabilities in certain schools and the graphs have been adjusted for these out of district transfers.

I can send the raw data, if it would be helpful."

(3) written statements from four residents of areas in west Kaua'i near sprayed fields.

Paul
